

PLEDGE OF THE CHIEF INSTRUCTOR

As student in aikido, I have been practicing aikido for the last 17 years. During this period I have had the wonderful opportunity and honour to practice aikido in many different countries abroad, and under the most leading aikido teachers in the world. In 2005 I took part in the World Games in Dusseldorf, Germany and 2006 I also visited and trained at the Aikido World Headquarters (Hombu) in Tokyo.

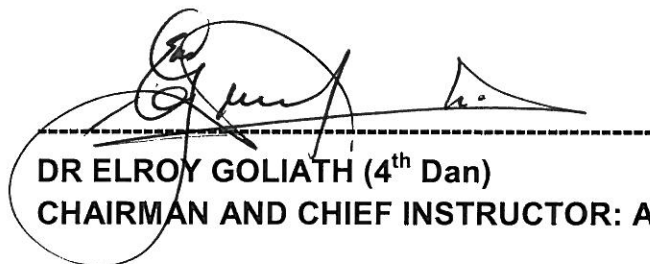

My relationship with Fujimoto Shihan started in 1999. He transformed my understanding of Aikido and I studied under him ever since. My biggest Aikido achievements were when I tested for my 3rd and 4th degree black belt under him in Europe, the latter during July 2011.

My only wish is to transfer the little I have learned from my teacher to our young people. These young people will receive the highest quality of aikido training available in the country and on par with the best in the world. I take personal responsibility for classes and will be assisted by some of my senior students.

Join me in experiencing your new journey in aikido.

Yours in Aikido
